

PEST CONTROL

Old South Exterminators, an excellent pest control company with an comprehensive pest control program who managed our pest program last year, will again be handling the Villas at Old South in 2020. Their procedures and processes make it possible to treat our buildings and individual condos once a quarter, as opposed to once a month. Our buildings and individual condos will be treated on the following schedule:

Tuesday, February 18, 2020

Tuesday, May 19, 2020

Tuesday, August 18, 2020

Tuesday, November 17, 2020

This once every three month treatment is much less invasive and limits the number of times you will have someone in your condo.

Because the pest control treatment is once every three months, it is very important that Old South Exterminators have access to the interior of your condo. Please make sure that we have a key to your villa and access and alarm codes if required. Please make arrangements to have pets outside your condo or secured in a crate so that the pest control technician can effectively treat your condo on the scheduled pest control days. **If you rent your condo, please make sure your tenants are aware of this schedule.**

Old South Exterminators have a very effective treatment program, but for the treatment to work, they must have access to your condo. If they are unable to access your condo and must return to treat your condo, additional charges may be incurred by the condo owner.
